PROFESSIONAL SUMMARY

Results-oriented Software Developer and recent Computer Science graduate (2026). Specialized in building high-performance, full-stack web applications using the Next.js ecosystem, React, and TypeScript. Experienced in developing end-to-end solutions, from pixel-perfect user interfaces to robust backend API integrations. Passionate about "Clean Code" architecture, Headless CMS (Sanity.io), and delivering scalable user experiences, with foundational knowledge in .NET backend development.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript (ES6+), C# (Foundational), HTML5, CSS3.
- **Front-End Ecosystem:** Next.js (App Router, Server Components), React.js, Zustand, Redux Toolkit.
- **Back-End & Databases:** Next.js API Routes / Server Actions, .NET (Foundational), SQL Server, RESTful APIs, Sanity.io (Headless CMS).
- **Styling & UI:** Tailwind CSS (v3 & v4), Shadcn UI, Framer Motion, Sass/SCSS.
- **Tools & Deployment:** Git, GitHub, Vercel, Postman, Figma-to-Code, Jest.

PROJECTS

1. Sadeem | Luxury E-commerce Platform (Latest Project)

A high-performance, bilingual e-commerce platform for luxury fashion, built with a focus on "Quiet Luxury" aesthetics and technical scalability.

- **Tech Stack:** Next.js 15, TypeScript, Tailwind CSS v4, Sanity.io (Headless CMS), Zustand, Shadcn UI.
- **Key Contributions:**
 - **Bilingual System (RTL/LTR):** Engineered a seamless language switching system (Arabic/English) with full direction support.

- **Headless CMS Integration:** Integrated **Sanity.io** to allow the client to manage products, inventory, and orders dynamically without coding.
- **Advanced UX:** Developed a "Slide-over Cart" for uninterrupted shopping and implemented URL-based filtering for shareable search results.
- **Performance:** Achieved top lighthouse scores using Next.js 15 Server Components and dynamic image optimization.
- **State Management:** utilized **Zustand** for efficient global state handling (Cart, Language, User Preferences).

2. Shifa | Clinic Management System (Graduation Project)

A comprehensive clinic management platform designed to streamline healthcare administration and patient data handling.

- **Tech Stack:** .NET, SQL Server, React.js, Redux Toolkit, JWT.
- **Key Contributions:**
 - **Backend Architecture:** Architected and developed the entire backend infrastructure and RESTful APIs from scratch using .NET.
 - **Data Management:** Designed the database schema to handle patient records, appointments, and clinic administration securely.
 - **Authentication & Security:** Implemented JWT Authentication for secure user login, role-based authorization, and session management.

EDUCATION

Fayoum University | Fayoum, Egypt

Bachelor of Science in Mathematics and Computer Science Graduated: 2026

LANGUAGES

Arabic: Native

English: Pre-Intermediate
